## **Tool for Ferrari F 40**

### **FMB 40**

This special tool has been developed for easy tightening and unscrewing 8-point-nuts of the Ferrari F 40. The torque is centrally fixed so that the tilting of the tool will be avoided.

We use high-strength aluminium alloys as they are used for aircraft-construction so that we can assure very stable and light tools.

The drive comes from a 1" square. With an adapter it can be reduced to a 3/4" square for allowing using a torque key.

8-point-nut

Tool FMB 40

## Accessoires

When unscrewing the nuts very high powers can develop. Therefore we recommend our big 1" ratchet with screw able handle bar extension.

For transporting the vehicle we recommend our special tool box fitted with soft textile for protection (protective sheath).

1" Ratchet with screwable  
extension, 100 cm long  
**Art. Nr. K600-1**

Adapter 1"-3/4"  
**Art. Nr. V34-1**

protective sheath, for tools  
**Art. Nr. F100-PC**

protective sheath long, for ratchet  
**Art. Nr. F300-CL**
